E17
D2

11. (Second Amendment) A device for converting a main supply voltage to a lower voltage comprising:
a housing;
a first male connector coupled to the housing, the first male connector operable to connect to a main supply voltage; and
a second male connector supported by the housing, and being operable to connect to an electronic device

D3

13. (Second Amendment) A device as claimed in claim 11, further comprising a switch coupled to the housing and operable to control the main supply voltage to the electronic circuit.

D4

15. (Second Amendment) A device for transforming a main supply voltage comprising:
a housing including an electronic circuit for transforming the main supply voltage;
a first electrical male plug coupled to the housing for connection with an electrical outlet supplying the main voltage;
a second electrical male plug supported by the housing for connection to an electronic device; and
a switch coupled to the housing to control the supply of voltage to the electronic circuit.

D5

17. (Amended) Device for transforming the main supply voltage into a lower voltage, comprising a first connector that can be plugged into a main supply socket, a second connector that can be plugged into a consumer and an electronic circuit for transforming the voltage which is located within a housing between the two connectors, and wherein the second connector (2) is supported by the housing.

REMARKS

Claims 1-17 are pending in the application. The Examiner rejected Claims 1-17 as being anticipated by the Applicant's admitted prior art shown in Figures 1 and 2. The Examiner also rejected Claims 1-17 as being unpatentable over U.S. Patent No. 5,160,879 ("Tortola"). Claims 1, 11, 15, and 17 have been amended.
